SUMMARY

Leveraging Generative AI and cloud technologies to solve complex business challenges, AI Platform Engineer with 1.9+ years of experience building AI-powered applications, multi-agent workflows, and intelligent automation platforms. Proficient in Python, FastAPI, AWS Bedrock, MLflow, and modern software engineering practices, with a focus on scalable and impactful AI solutions.

WORK EXPERIENCE

AI Platform Engineer, zeb

Oct 2024 – Jun 2026

- Designed and developed production-grade Generative AI and Agentic AI applications using Python, FastAPI, AWS Bedrock, and PostgreSQL.
- Engineered LLM-powered systems including multi-agent workflows, conversational AI platforms, semantic search solutions, and AI evaluation frameworks.
- Implemented RAG architectures, vector embedding pipelines, MLflow-based evaluations, and scalable microservices using Docker and AWS services.
- Recognized for strong ownership, collaboration, communication, and delivering high-impact AI solutions aligned with business objectives.

Python and AI Intern, Galwin Technology

Jan 2024 – Jan 2024

- Completed hands-on assignments and practical implementations covering Python programming, Machine Learning fundamentals, data preprocessing, and model development concepts.
- Developed mini-projects and coding solutions to apply core AI and ML techniques in real-world problem scenarios.
- Received positive feedback from mentors for quick learning ability, technical curiosity, teamwork, and commitment to delivering quality outcomes.

EDUCATION

Master of Data Science

2022 – 2024

Holy Cross College, Trichy

- Major in Data Science
- Final CGPA: 8.98

Bachelor of Computer Science

2019 – 2022

Bishop Heber College, Trichy

- Final CGPA: 8.34

KEY SKILLS

- | | | | |
|----------------------|---------------|-------------------|---------------------|
| • Python | • AWS Bedrock | • AsyncIO | • LLM |
| • SQL | • MLflow | • Semantic Search | • MCP |
| • REST APIs | • Agentic AI | • AWS S3 | • AWS Cloud Watch |
| • FastAPI | • RAG | • AWS ECS/EKS | • Vector Embeddings |
| • Prompt Engineering | • Langchain | • Docker | • Generative AI |
